Profile Summary

- Software Engineer with hands-on experience in Java EE, Spring Boot, and full-stack development using Django and modern web technologies. Proficient in building secure authentication systems, scalable microservices, and cloud-native applications with AWS and Azure. Passionate about developing efficient, data-driven solutions in every domains, with a focus on security, performance, and DevOps practices.

Education

Punjab University College of Information and Technology (PUCIT)   **2020 − 2024**
B.S. in Information Technology, CGPA: 3.66   *Lahore, Pakistan*

Experience

i2c Inc.   **July 2024 − Present**
Software Engineer   *Lahore, Pakistan*

- Developed and maintained Java-based applications using Java EE, JSP, and Spring Boot, upgrading legacy systems from Java 8 to Java 21 for improved performance and security.
- Built a Single Sign-On (SSO) service enabling seamless user authentication across different web app versions without password exposure, utilizing secure token mechanisms.
- Created new screens and functionalities in the Customer Agent Software for card management and credit line operations, integrating with Informix DB for reliable data handling.
- Implemented RESTful APIs and used Maven for building and deploying JARs, ensuring compliance with enterprise standards.
- Collaborated in Agile teams for sprint planning, code reviews, and deployment automation.
- Established secure authentication mechanisms using Spring Security, OAuth2, and JWT, ensuring compliance with PCI-DSS standards
- Utilized Kafka and RabbitMQ for asynchronous messaging, reducing transaction processing delays.
- Collaborated with cross-functional Agile teams to deliver features on time, participating in daily stand-ups, sprint planning, and code reviews.
- Optimized database interactions using Spring Data JPA, Hibernate, and Redis, enhancing query performance.

Internships

DevOps Internship   **July 2023 − September 2023**
Full-Stack and API Development   *Lahore, Pakistan*

- Developed full-stack applications using Django, Tailwind CSS, Bootstrap, and PostgreSQL, focusing on scalable and responsive designs.
- Built and deployed RESTful APIs with Django REST Framework, integrating Cloudinary for media storage and Docker for containerization.
- Created Bugzilla-based project management tools and hosted applications on Azure Docker containers for enhanced deployment efficiency.
- Conducted API development and testing, ensuring robust backend services with modern DevOps practices.

Notable Projects

TeleHealth Platform | Full-Stack Developer   **2023 − 2024**

- Developed a comprehensive telehealth application using Django, HTML, CSS, Tailwind, SQLite, and Stripe for secure video consultations and payments.
- Integrated Google Meet API for real-time meeting links and Cloudinary for image storage, with Redis for efficient patient search and authentication.
- Implemented an AI-powered chat feature for free therapy sessions, enhancing user engagement and accessibility.

E-Commerce Platform | Full-Stack Developer   **2023**

- Built a scalable e-commerce site with Django, HTML, CSS, Bootstrap, SQLite, and Stripe, supporting user authentication, order management, and secure payments.
- Designed intuitive user interfaces and backend services for inventory tracking and transaction processing.

Technical Skills

- **Languages:** Java, JavaScript, Python, C++, SQL
- **Frameworks & Tools:** Spring Boot, Django, JSP, Jersey, Maven, Docker, Bootstrap, Tailwind CSS, REST APIs
- **Databases:** PostgreSQL, SQLite, MongoDB, Informix DB, Redis
- **Cloud & DevOps:** AWS, Azure, Cloudinary, Git, Bugzilla
- **Other:** SAML, Stripe Integration, Google Meet API, Agile/Scrum

Extracurricular Activities

- Google Developer Student Ambassador
- Amazon Community Builder
- Microsoft Learn Student Ambassador
- Attended Amazon Web Services Summit
- Founder, REDIS Cyber Block Community
- Notion Campus Ambassador

Languages

- English: Fluent   Urdu: Native
